

Mihael Cudic

Website: www.mihaelcudic.com; Email: mcudic@mgh.harvard.edu

Education:

University of Oxford (UO), Balliol College, UK

2018-2023

Ph.D., Artificial Intelligence for Biomedical Sciences

- Fully funded through the **National Institutes of Health Oxford-Cambridge Scholars Program** (1 of 11 in USA)
- Recognition: **National Science Foundation Graduate Research Fellow Recipient** (1 of 2,000 in USA)

University of Florida (UF), USA

2014-2018

B.Sc., Electrical Engineering

- Graduated from the Honors Program and Summa Cum Laude (GPA: 3.97/4.0)
- Fully funded through the **Lombardi Scholars Program** (1 of 11 @ UF)
- Recognition: **Barry Goldwater Scholar** (1 of 240 in USA), UF's **Outstanding Scholar** (1 of 32 @ UF), UF's **Electric E Award** (1 of 8 @ UF's ECE Dept.), **x8 UF's Dean's List**

Relevant Skills:

Machine Learning: Large Language Models • Generative AI • Neuroimage Analysis • Medical Image Analysis • Deep Learning • Segmentation • Auto-encoders

Genetics: Population Genetics • Genome Wide Association Studies • Polygenic Scores

Epidemiology: Causal Inference • Target Trial Emulation • Synthetic Controls • Stochastic Compartmental Models

Wetlab: Fluorescent Labelling • Transgenic Mouse Lines • Microscopy • Dissections

Research/Work Experience:

Massachusetts General Hospital (MGH), Boston, MA USA

Sep.23-Present

Precision Psychiatry Postdoc & T32 Fellow in Precision and Genomic Medicine

Mentors: Dr. Jordan Smoller (Director of the Center for Precision Psych. at MGH) and Dr. Alkes Price (Harvard School of Public Health)

- Developing methods to increase the portability of polygenic scores across biobanks
 - Characterized the changes in relative and absolute genetic risk across environmental contexts [3]
 - Demonstrated the clinical utility of Large Language Models to infer depression severity from clinical notes [1]
 - Led a sub-aim within an international consortium investigating the causal effects of COVID-19 containment policies on mental health [2]
- (Additional Project Supervisors: Dr. S. Bauermeister, Dr. M. Hernan, Dr. V. Patel, Dr. R. Kessler)

University of Oxford, Oxford, UK & **National Institutes of Health**, Bethesda, MD USA

Aug.18-Jun.23

Computer Vision and Neuroscience Graduate Research Fellow

Mentors: Professor Alison Noble OBE (Former Director of the Inst. Of BioMed. Eng. at OU) and Dr. Jeffrey Diamond (Scientific Director at Nat. Inst. Of Neuro. Diseases and Stroke)

- Developed custom deep learning pipelines leveraging generative AI to accurately analyze noisy 3D images of neurons with minimal labeled ground truth data [4-5]

University of Florida, Gainesville, FL USA

Jan.15-May.18

Undergraduate Researcher & University Scholar

Mentors: Dr. Jose Principe (Professor at UF)

Developed neuro-inspired [8] and kernel-based [6] computer vision algorithms for small-scale image classification

Carnegie Mellon University, Pittsburgh, PA USA

Jun.-Aug.17

Machine Learning Intern & Summer Scholar

- Predicted plant genotypes using AI-extracted phenotypes from in situ images [7]

Appointments:

- **Adjunct Dunlevie Honors Professor** at UF (4.8/5.0 evaluation for Signature Course) Jan.-May24
- Undergraduate **Engineering Computation Teaching Assistant** at UO Oct.-Ex.Dec.22
- Graduate **Machine Learning Teaching Assistant** at UF Aug.-Dec.17
- Undergraduate **Electronic Circuits Teaching Assistant** at UF Jan.-May.16

Extracurriculars & Other:

Study Abroad:

- **University of Pretoria**, South Africa: *South African Politics & History* (GPA: 4.0/4.0) May-Jun.17
- **Universidad Autónoma de Yucatán**, Mexico: *Tropical Ecology & Sustainability* (GPA: 4.0/4.0) Jun.-Aug.14

Other Roles: UK's **Young Entrepreneurs Society Member** (2022); Balliol Graduate **Returning Officer** (2022); Balliol **Football Captain** (2021-22); Balliol **Tennis Team Member** (2022); OU's **Scandinavian Society Member** (2022); **Balliol Choir Member** (2019-20); UF's **Culinary Arts Student Union's Logistic Director** (2015-16)

Selected Presentations:

- 2026 Boston; **Center for Genomic Medicine @ MGH**; "Putting Polygenic Scores in Context: How Intersectional Factors Affect Relative and Absolute Genetic Risk"; (Oral)
- 2025 Cancun, Mexico; **World Congress for Psychiatric Genetics**; "Putting Polygenic Scores in Context: How Intersectional Factors Affect Relative and Absolute Genetic Risk"; (**Oral Symposium**)
- 2025 Boston; **Primer on Medical and Population Genetics @ the Broad Institute**, "[From Code to Clinic: A History of AI in Medicine](#)" (Oral)
- 2024 Singapore; **World Congress for Psychiatric Genetics**, "Polygenic Scores across Environmental Contexts: How Intersectional Factors Affect Predictive Accuracy for Psychiatric Conditions" (Poster)
 - **Early Career Investigator Program Awardee; Best Poster Presentation Winner**
- 2022 Oxford, UK; **Medical Image Analysis Seminar Series @ University of Oxford**, "Generative Adversarial Networks for Microscopy Images" (Oral)
- 2021 Online; **Sensory Neuroscience Seminar Series @ National Institute of Health**, "Using Machine Learning to Study Starburst Amacrine Cells" (Oral)
- 2019 Berlin, Germany; **Max Planck / HHMI Connectomics Meeting**, "Automatic Segmentation of Overlapping Neurons Using Convolutional Neural Networks" (Oral)
